

Cart Management

Cart Management

Why cart management!

Abandoned carts affect us every day and everywhere. Customers tend to abandon shopping carts wherever they have finished using them. Abandoned carts not only cause accidents, but also increase labor costs associated with collecting the carts. In addition to labor, other costs include repair and replacement. Reducing the number of abandoned carts will save your store money, and in turn save your customers money.

▶ Save on labor costs

The labor costs associated with retrieving shopping carts are a major cost factor for every store. systemec cart management effectively reduces these costs. Shopping carts with coin locks organize themselves.

▶ Save on service costs

Abandoned carts are not treated well – they get bumped around and suffer damage. The maintenance costs for these carts are significantly higher than for carts that are equipped with coin locks.

▶ Lose fewer carts

Even though the deposit of 25 cents is small, loss of carts will be reduced. With a very small investment, you can make a big change to your balance sheet.

Why systemec!

High-quality materials and the skill and experience of all systemec employees are the ingredients for products that are ready to take tough everyday usage in a retail environment. systemec developed the first cart management system with coin locks already in 1981. This vast experience has led to a product range that fits almost any bill. Whether it's an economic, all-plastic solution, heavy duty metal lock, or an integrated advertising solution, systemec has the solution for you.

Easy to Use

► Take your cart

system's cart management system is very simple to use. Insert a coin or KeyCard to release the cart and begin shopping.

► Return your cart

When returning the cart, insert the key from the cart in front into your cart's lock, and the coin or KeyCard will be released.

► Available coin

The coin lock accepts a quarter, as indicated in a permanent and durable engraving on the housing.

► Customer Convenience

system's cart management system is a small deposit with a big return: your carts are securely nested inside the store, adjacent to the store, or in the parking lot corrals. Customers will appreciate the convenience of having carts immediately at their disposal.

Outstanding Features as a Standard

► Costsaving

Casing and cassettes are all made from high-quality resistant plastic that has been tried and tested over many years. We also put a great value on easy handling. With a special key, coin cassettes can be replaced easily in just a matter of seconds.

► Unique Design

systemc's well proven S-shaped key is compatible to almost all offered systemc coin locks. Easy handling is guaranteed due to the small and light key which is free of any sharp edges. Key and chain are constructed from high-quality stainless steel and are extremely durable.

► Durable

Extremely durable engraved coin or card symbols help customers to know immediately what is required for unlocking the cart.

► Masterkey

Nested carts can be easily released with our masterkey. Store employees won't need a coin to release the shopping carts. Just put the masterkey into the key slot and the cart can be removed.

Get Connected with Coin Locks

▶ **smartloc** **Simple & compact**

smartloc combines strength with a compact design. Mounting is simple, with only one screw which secures the lock to the handlebar, holds the chain in place, and stops the lock from twisting.

■ **Compact**

Small and neat, and well protected against vandalism.

■ **Service-friendly**

Coin cassettes are quick and easy to replace.

■ **Universal**

One screw secures the lock to the handlebar, and the flexible clamp allows smartloc to be fitted to almost any shopping cart.

■ **Compatible**

Compatible with all other systec coin locks.

■ **Apparent**

Coin symbols are engraved on top of the housing to help customers to see at a glance what coin is required for unlocking the shopping cart.

▶ **duraloc** **Universal & compact**

Since it was introduced in 1994, duraloc has proved its worth worldwide, thanks to its extremely robust housing.

■ **Universal**

One screw secures the lock to the handlebar, and the flexible clamp allows duraloc to be fitted to almost any shopping cart.

■ **Robust**

Outer and inner housing effectively protect the duraloc mechanics.

■ **Apparent**

Coin symbols are engraved on top of the housing to help customers to see at a glance what coin is required for unlocking the shopping cart.

■ **Service-friendly**

Cassette can be changed in just a few seconds.

■ **Compatible**

Compatible with all other systec coin locks.

▶ **uniloc** **Vertical & variable**

Owing to its small width and upright design, uniloc can be side-mounted.

■ **Upright design**

Small housing makes uniloc an ideal fit for flatbed and home improvement carts.

■ **Service-friendly**

Cassette can be changed quick and easy.

■ **Universal**

One screw secures the lock to the handlebar, and the flexible clamp allows uniloc to be fitted to almost any shopping cart.

► **variloc heavy** **Proven & stable**

variloc heavy is the coin lock for heavy duty applications. The housing and clamp are made of metal, and are therefore particularly resistant, strong, and rust-proof. The extremely durable zinc die-cast housing is combined with a high-strength powder coating.

■ **Strong**

The housing and the clamping element are made of metal, and are therefore particularly resistant and strong.

■ **Apparent**

Coin symbols are engraved on top of the housing to help customers to see at a glance what coin is required for unlocking the shopping cart.

■ **Compatible**

Compatible with all other systec coin locks.

► **cardloc** **Intelligent & independent**

cardloc combines conventional cart lock technology with intelligent KeyCard functions. Combinable with: coin only / KeyCard only / KeyCard and coin. The KeyCard-only option offers a number of special applications, e.g. controlled release of expensive children's shopping carts. The KeyCard guarantees much higher protection against forgery than does a standard shopping cart token.

■ **Outstanding**

Only cardloc enhances the classic coin lock function with a KeyCard.

■ **Service-friendly**

The cassette can easily be replaced.

■ **Compatible**

Compatible with all other systec coin locks.

■ **Solid**

A robust housing protects the interior mechanics from vandalism.

■ **Universal**

One screw secures the lock to the handlebar, and the flexible clamp allows cardloc to be fitted to almost any shopping cart.

■ **Apparent**

Coin symbols are engraved on top of the housing to help customers to see at a glance what coin is required for unlocking the shopping cart.

The Number 1 Choice for Cart Management

Founded in 1974, systec developed the first patented coin lock for shopping carts in 1981. Since that date, systec has become the global and technology leader in this field. systec's products now range from coin deposit locks and antistatic handlebar systems, cart advertising systems to child safety and containment systems for shopping carts. systec is the supplier of all leading shopping cart manufacturers and exports its products to more than 50 countries.
