

liveTec mobile

The smartphone docking station for shopping trolleys

The new way of shopping

The liveTec mobile docking station provides a secure and convenient way of using your smartphone in the supermarket. Mobile applications such as self-scanning and mobile payment can be easily used.

The following liveTec models are available:

▶ **liveTec mobile pro+**

The smartphone in the docking station is protected against theft by a RFID token, the smartphone battery is charged while shopping.

▶ **liveTec mobile pro**

The smartphone in the docking station is protected against theft by a RFID token.

▶ **liveTec mobile eco**

A purely mechanical solution to secure the smartphone onto the trolley handle.

Products can be scanned even with the smartphone locked in the docking station. Information such as third party or private label adverts, instore navigation or special offers can be optimally displayed on the smartphone screen.

liveTec mobile is available for the systec trolley handles relaXt, Vario XT and ergo II.
